

REDEFINE N100 DARES YOUNG LEADERS INTO REIMAGINING THE FUTURE IN TERMS OF OPPORTUNITIES AND EMBRACING TECHNOLOGY & INNOVATION TO TRANSLATE THOSE OPPORTUNITIES INTO LASTING IMPACT.

ReDefine Next 100 is the annual global youth programme of the Global Arena Research Institute (GARI).

GARI brings together extraordinary young leaders from **across the world and across diverse fields** including humanities, technology, social sciences, engineering, medicine, computing science, art and the natural sciences.

ReDefiners have a proven commitment and engagement to represent innovation, the future and interdisciplinarity across the domains of technology and the social sciences (economy, politics, policy, law, and more).

The young leaders identify a **paramount global challenge of the present & future and reimagine the obstacles, identify the opportunities and redefine the course towards that opportunity** rather than be driven by challenges.

In diverse international teams ReDefiners incorporate innovative ideas from various respective fields and propose a way to translate opportunities into lasting impact.

2018 saw over 600 applications from over 50 countries. The call was shared by UNESCO, Harvard University, European Youth Federation and more, with 13 young leaders selected, 3 projects incubated and over 100 hours spent project building, networking with speakers and partners at the N100 Symposium and redefining the future.

2019 will bring up to 15 ReDefiners to Prague for the November programme. The winning teams will present and speak at the Next 100 Symposium, GARI's flagship event.

2019 REDEFINE N100 AGENDA

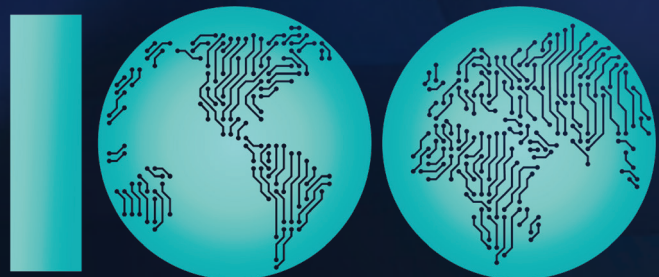

REDEFINE NOVEMBER WEEK

14-22.11. The top projects/groups return to Prague to complete their startups and social entrepreneurship projects, set up meetings and prepare material to present at the Next 100 Symposium. They will start outreach to potential partners, sponsors and venture capitalists. ReDefiners need to prove their idea is innovative, unique, necessary, viable and applicable in the current global environment.

NEXT 100 SYMPOSIUM

19-21.11. The winning ReDefiner teams/projects will present at the Next 100 Symposium and speak on a high-level panel discussion along with key leaders in the field. Team members will have the opportunity to present challenging ideas to the participants and engage with key global actors, including government and international organisation representatives. ReDefiners will have also set up meetings with N100 partners and speakers about their project.

PROJECTS

GRIDHUB

FOR A FEW CENTS MORE PER KILOWATT AND WITH THE SWIPE OF A BUTTON, YOU CAN BECOME A POSITIVE ACTOR IN THE FIGHT AGAINST CLIMATE CHANGE. EVERY SINGLE PERSON IN THE DEVELOPED WORLD IS AN ENERGY CONSUMER, SO IF GRIDHUB CAN CAPTURE EVEN A SMALL FRACTION OF CONSUMERS, IT WILL UNLOCK A HUGE MARKET.

GridHub is developing a user-friendly platform that connects smartphone-using energy consumers to green energy providers and government rebate programs in deregulated energy markets. Gridhub will be a well-designed, fast middleman between end consumers and green energy producers.

INTERNATIONAL REMITTANCE PROJECT

DIRECTING \$667BN TO NATIVE COMMUNITY DEVELOPMENT

Innovating the international remittance system, by redressing remittances to support local investment and savings. Partnering with leading, transparent, cost-effective money-transfer service providers, international organizations as well as community-based projects, this platform connects the ability to transfer remittances (money) and community projects to invest in.

REDEFARM

DEVELOPING AN INTEGRATED ASSESSMENT TOOL FOR SMALL FARMERS TO ANALYZE THE ECONOMIC AND ENVIRONMENTAL LANDSCAPE.

The tool will incorporate critical data on soil, hydrology, topography, future climate risks, local stakeholders such as NGOs, regional markets and buyers, and other supply chain information. This product is intended to inform farmers, and also to build capacity for using technology to make more evidence-based decisions.

ReDEFINE NEXT100 GLOBAL YOUTH PROGRAMME PARTNER WITH GARI

The **ReDefine Next 100 Global Youth Program** is more than just a prestigious program for young leaders to work together to develop innovative proposals. **ReDefine** reflects the idea that collaboration is essential to innovation. At GARI, we recognize that innovation and brilliance transcend all boundaries, be they economic, political, or otherwise, and that in order to reach our global potential, we all must work together in the same fashion.

While financial support is an important aspect of any partnership, it is not the driving factor. We value integrity, vision, and a unique approach to addressing global challenges. There are many avenues through which we can partner including but not limited to the sharing of contacts and resources, project collaboration, and of course, financial support. Ideally, each partnership would be a mixture of these three.

Partnership options to provide a starting point for our discussions. All partnerships are tailored and reflect the partner's interests and wishes:

ReDefine brings together some of the brightest youth leaders from across the world and provides a space for international collaboration and innovation. By partnering with GARI, and thus combining some resources, reach, and passion, the ReDefine Next 100 Global Youth Program can truly shape the future of global innovation, together.

GLOBAL ARENA RESEARCH INSTITUTE NEXT 100 SYMPOSIUM

Global Arena Research Institute is an independent, non-partisan research organization that combines the most advanced methods of AI-driven data, scientific and other artificial reasoning capabilities, elevating the data science into a completely new level of opportunities. Our goal is to provide unprecedented insights into the nature,

impact, and management of globalization in order to improve business, institutional and governmental decision making. Our mission is to make the best of organically connecting AI-level reasoning capacities with the human-level critical reasoning capacities for the sake of a better future.

For the second time, Prague will host the Next 100 Symposium (19-21 November), a global future-oriented meeting. Political, business, academic leaders, innovators and other influential thinkers will gather and discuss how to transform current challenges into future opportunities.

The first Next 100 Symposium marked the 100th anniversary of the end of World War I. In the aftermath of the war, the foundations for a multilateral global order were laid out.

Today, those foundations are being challenged in a world overwhelmed with digital, technological, social, political, economic and environmental transformations. The Next 100 Symposium provides a global platform to link technological progress with social and political advancement, to convert societal anxieties into global empowerment.
